Making a Difference: Providing valuable programs that aid veterinarians, animals, and society

The American Veterinary Medical Foundation (AVMF) is the charitable arm of the AVMA. It is recognized as the premier charitable foundation that helps protect, promote, and advance a strong, unified veterinary profession through programs that benefit veterinarians, animals, and society. Our programs include veterinary charitable care, disaster relief, crisis support, education, and animal health research. The AVMF is proud to report another year of strong growth and support from our donors, which allowed us to expand our disaster relief program to support veterinarians, rescue organizations, and shelters in war-torn Ukraine. Our efforts helped provide urgent medical care for hundreds of displaced animals in Ukraine, as well as natural disasters throughout the US.
Making a Difference: Providing valuable programs that aid veterinarians, animals, and society

Our focus this past year also included support for veterinary and veterinary technician students preparing to address the animal and public health needs of society. We believe that by investing in these outstanding students, we play a role in ensuring that future veterinarians and veterinary technicians have the skills and training necessary to provide animal healthcare and protect public health.
